DETAILED ACTION

This office action is in response to the communication filed November 12, 2002.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 17 is rejected under 35 U.S.C. 102(a) as being anticipated by Parker et al.

(“Deposition of passivated gold nanoclusters onto prepatterned substrates”).

Regarding claim 17, Parker discloses an article including a solid semiconductor (silicon) having a passive surface bearing nanoclusters of atoms (column 1, pg. 2833).

Allowable Subject Matter

Claims 1-11 are allowed.

The following is an examiner’s statement of reasons for allowance:

The primary reasons for the allowance of claims 1-6 and 8-10 is the inclusion therein, in combination as currently claimed, of the limitations of passivating the surface of a material with a pulsed laser beam having a pulse duration no longer than the atomic vibration period of the material. This limitation was found in claim 1 and is neither disclosed nor taught by the prior art of record, alone or in combination.

The primary reasons for the allowance of claim 7-10 is the inclusion therein, in combination as currently claimed, of the limitations of passivating the surface of a material with

Art Unit: 2822

a pulsed laser beam having a pulse of no longer than 10^{-11} seconds. This limitation was found in claim 7 and is neither disclosed nor taught by the prior art of record, alone or in combination.

Claims 18-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The primary reason for the indication of the allowable subject matter of claims 18-20 is the inclusion therein, in combination as currently claimed, of the limitation of a compound semiconductor having a passive surface bearing nanoclusters of atoms. This limitation is found in claims 18-20 and is neither disclosed nor taught by the prior art of record, alone or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Belouet et al. disclose passivating a GaAs surface by irradiating the surface with a pulsed laser beam having a pulse duration of 4-6 ns.
